## EDUCATION

- Lovely Professional University** Punjab, India  
*Bachelor of Technology - Computer Science and Engineering; CGPA: 8* Since Aug 2023
- Victoria Public School** Amroha, Uttar Pradesh  
*Intermediate; Percentage: 87.4* Apr'21 – May'22
- St. Mary's Convent School** Amroha, Uttar Pradesh  
*Matriculation; Percentage: 93.4* Apr'19 – Mar'20

## PROJECTS

- Convorbit AI** | [Live](#) | [Github](#) Jun'25 – Apr'26
  - Used by **700+** users at Lovely Professional University, **Built** a full-stack AI meeting intelligence SaaS automating transcription, summarization, and Jira ticket creation via bots, eliminating **100% manual post-meeting work**.
  - Designed a RAG pipeline** enabling natural language Q&A over meeting history, reducing hallucinations by **~30%** using speaker-diarized transcript grounding.
  - Architected** a scalable event-driven backend integrating Slack, Jira, Asana, and Trello; reduced infrastructure cost by **~90%** using **AWS Lambda** and improved embedding throughput by **~3×** via batched indexing.

**Tech Stack:** Next.js, TypeScript, Gemini, Pinecone, AWS S3, AWS Lambda, Slack Bolt, Jira, Asana, Trello

- BugHop AI** | [Live](#) | [Github](#) Jan'26 – Mar'26
  - Developed** an autonomous AI coding agent that resolves GitHub issues end-to-end (webhook → fix → Pull Request), reducing issue-to-PR time by **~95%** (<3 mins from ~2 hrs).
  - Built** a custom **RAG system** using **AST (Abstract Syntax Tree)**-based code chunking and Qdrant vector DB to provide function/class-level context, reducing code hallucinations by **~50%**.
  - Engineered a high-concurrency repository indexing pipeline using **Python asyncio**, processing **300+ files and 40,000+ LOC** in less than 70 seconds while reducing embedding network calls by **~90%**.

**Tech Stack:** Next.js, TypeScript, TailwindCSS, PostgreSQL, Prisma, Groq, Gemini, Qdrant, Inngest

- Hospitrix** | [Live](#) | [Github](#) Mar'25 – May'25
  - Built** a full-stack healthcare platform (MERN) with Patient, Doctor, and Admin portals for appointment booking and management, improving API latency by **~40%** (**~120ms** → **~70ms**).
  - Optimized** media handling by offloading base64 image uploads to **Cloudinary**, reducing database storage by **~85%** and improving asset delivery performance.
  - Secured** booking and payment flows using Zod validation across **20+ REST APIs**, eliminating **100% malformed database writes**.

**Tech Stack:** React.js, Node.js, Express.js, MongoDB, TypeScript, TailwindCSS, Zod, Razorpay API, JWT, Bun

## CERTIFICATES

- AWS AI Practitioner (AIF – CO1)** | [Link](#) May'25
- AWS Cloud Practitioner (CLF – CO2)** | [Link](#) May'26
- Oracle Certified AI Foundations Associate** | [Link](#) May'26

## TECHNICAL SKILLS

**Languages:** C++, JavaScript, SQL

**Frameworks & Libraries:** Next.js, React.js, Express.js, Node.js, Prisma, Tailwind CSS, shadcn/ui

**Cloud & DevOps:** AWS(EC2, ECS, ECR, EKS, Lambda, ASGs, S3), Docker, Kubernetes, CI/CD (GitHub Actions), Monitoring(Prometheus, Grafana), Helm, ArgoCD, Gitops, Kafka, Inngest

**AI & Data Engineering:** LangChain, RAG, n8n, MCP, LLM Memory Layers

**Databases:** MongoDB, PostgreSQL, Qdrant, Pinecone, Redis

**Coursework:** DSA, OOP, OS, CN, SE, DBMS
